

SHIRI LANGER

 +39 329 0134096

 +972 546 542232

 shirilanger@gmail.com

 Milan, Italy

Industrial designer experienced in guiding projects from early concepts to production, combining technical understanding with hands-on prototyping and manufacturing awareness, driven by a strong human-centered design approach.

Education

Shenkar College | Israel
B.Des in Industrial Design
Oct 2021 – Aug 2025

IED College | Milan, Italy
Erasmus- Product Design
Feb 2024 – July 2024

Product Development

- Concept development
- Functional prototyping
- Feasibility-driven design
- Multidisciplinary collaboration

Manufacturing

- Low- & high-pressure injection molding
- Mold design & tolerance adaptation
- Material-driven design
- CNC & production detailing
- Technical drawings

Software skills

- SolidWorks
- Onshape
- Rhino
- KeyShot
- Adobe Suite

Languages

- Hebrew- Mother tongue
- English- Advanced
- Italian- A2

Selected Projects

- **3D FILTERS**- Innovative Facial Accessories.
- **Project Itamar**- TOM Global (Tikkun Olam Makers)

 <https://shirilangerdesigns.com>

Awards & Recognitions

Winner - FIT Sport Design 2025
Shortlist- Isola Design Award 2025

Work Experience

Apr – Dec
2025

Industrial Designer & Founder of In-House Design Studio China Direct| LPM Solutions | Even Yehuda, Israel

- Worked within a manufacturing environment specializing in low-pressure plastic injection for electronics and sensitive components.
- Developed and modeled products and molds across different production technologies, adapting designs to material and manufacturing constraints.
- Conducted experimental testing of 3D-printed molds in collaboration with engineers and factory teams.
- Established and managed the in-house design studio, overseeing project organization, supplier coordination, and budget management.

Mar 2025-
Present

Freelance Industrial designer, ARC Innovation Center, Sheba Tel-Hasomer Medical Center| Ramat Gan, Israel

- Contributed to the early-stage development of a patent-pending medical product within a multidisciplinary team, collaborating on concept refinement and internal mechanism definition.
- Developed iterative 3D-printed prototypes to assess usability and mechanical feasibility, with consideration of future U.S. medical device regulatory requirements.

Aug – Oct
2024

Industrial designer, Jonathan Bar-Or Ltd. Design Studio Pardes Hanna, Israel

Refined and developed product concepts for CNC manufacturing, focusing on material behavior, structural detailing, and production feasibility.

Jun – Aug
2022

Industrial designer, TOM Global (Tikkun Olam Makers) Tel-Aviv, Israel

Contributed to the development of an ergonomic, water-resistant prosthesis within a multidisciplinary team. Integrated multi-material 3D printing and textile solutions to enhance functionality and user comfort.
